## DETAILED ACTION

### *Claim Objections*

Claim 3 is objected to because of the following informalities: "damage is created "in" a result", should "in" be "as"? Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 & 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Troitski (US Pat. 6,417,485).

Troitski discloses an apparatus for creating points or areas of laser-induced damage inside a transparent material. Patterns are created inside a transparent material using a pulsed laser. Once the beam is emitted from the laser it is directed to a beamsplitter. Beams are then directed to an optical system, which forms a pattern of the laser output that will be focused inside the transparent material. Additionally, a transfer mirror is used and computer control maintains the system operation. (abstract, col. 1, lines 14-17, col. 9, lines 8-20, col. 10, lines 29-68, figures 3 & 5).

***Allowable Subject Matter***

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the claim as supported by the specification differs from the prior art in that it does not teach using a computing phase hologram.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.
